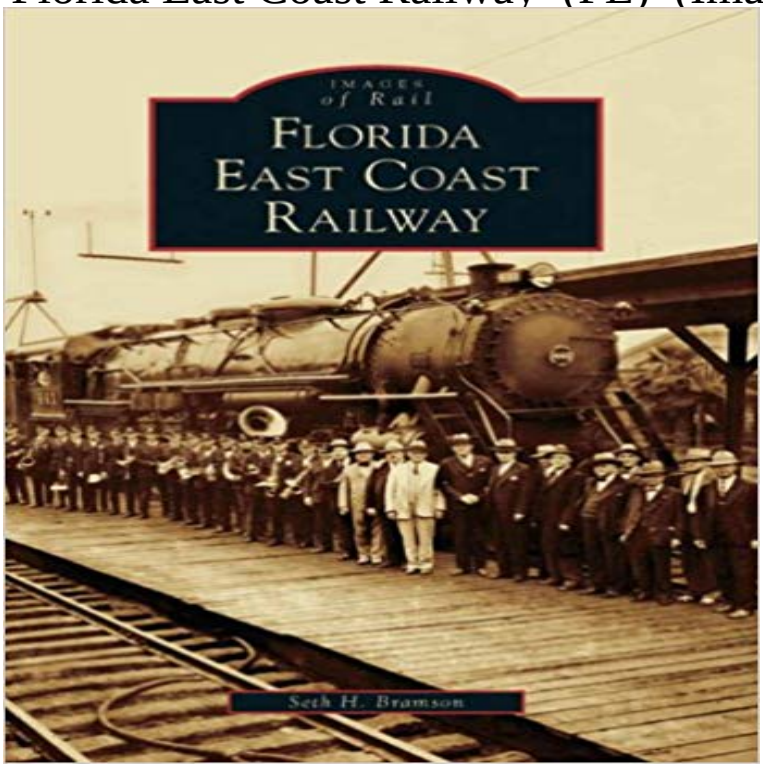
Florida East Coast Railway (FL) (Images of Rail)



Florida East Coast Railway has been the speedway to Americas playground for more than 110 years. FEC offered some of Americas finest rail passenger service until 1968 and remains the freight lifeline of Floridas east coast. The railroad arrived on the shores of Biscayne Bay on April 15, 1896, and it reached Key West in January 1912. That feat etched both Henry Flaglers and the railroads names in Florida and U.S. railroad history. FECs operation is so precise and punctual, its roadbed and motive power so well maintained, that it is the benchmark for every other railroad in the country.
