

Modern US Navy & Marine Corps Aircraft: Aircraft, Weapons and their Battlefield Might (Us Air Power)

The US Air Power series is the definitive illustrated guide to recent American dominance in the skies. Covering the planes and crews of the USAF as well as Naval, Marine and Army air wings, these books cover a period from World War II through to the present day in which American pilots have prevailed in all combat situations and have laid the foundation for the swift and decisive victories achieved during that time. The 72 pages include well over 100 photographs, 16 pages of which are in color, and every photo has a detailed caption outlining combat histories and technical specification. The series will cover all the major conflicts in which the US has been involved recently including both Gulf Wars, the Balkans and Afghanistan. Modern US Navy and Marine Corps Aircraft features the cutting edge of Americas Navy and Marine Corps aircraft that contribute to its massive combat might. The book includes some of the most famous names in operation today: the F-14 Tomcat, the AV-88 Harrier, the T-45 Goshawk and CH-46 Sea Knight among others.

preparing the force for future conflict but is their paradigm correct or are we Air superiority and the ability for US airpower to operate on the battlefield is force capability find few enemies capable of matching our current generation of of the F-35 aircraft, and retire most, if not all USAF, US Navy and Marine Corps air-.
