

## Cancer - 100 Things To Do Besides Chemo

All I am saying is: Give our hearts a chance. Cancer: 100 Things To Do Besides Chemo presents to those suffering from cancer a new option: stop feeling like victims and regain the ability to control their health by choosing to live and be healed completely - and even spontaneously - from cancer. In 2002 I was healed from stage 4 Hodgkins lymphoma. I dedicated my life to cancer research, exploring not only my own healing, but also how I could stay cancer-free for the rest of my life. Fascinated by the healing powers of the human body and creation, I discovered remarkable, naturally-occurring patterns, grounded in the biology of human decision-making, that guide how I act, think, and communicate to cultivate my own healing. Cancer entered my life again in 2014 with my younger sisters diagnosis: stage 4 melanoma. Imagine the person closest to you receiving this news. What do you tell him to do? Where should she begin? Whats the secret? I wrote my sister a letter, filled with all the things I learned from my healing journey. That letter became this book: My 100 Things to Do Besides Chemo. There are no remedies or homeopathic suggestions within; these are my paths, tips I learned along the way, the ones that have stayed with me and that I use to this day, fifteen years after my complete cure. I recognized their power again when my sister followed them, underwent medical treatment, and found her own healing. I believe we suffer from a War-On-Cancer mindset. In our modern society, the inability to hear that love, positive emotions and beliefs, and daily healthy lifestyle habits are a strategy for survival, is a measure of how brainwashed we all are into thinking that treatment for cancer must always be harsh, drastic, and violent. Over and over again, I see people have a hard time imagining that something so seemingly soft and gentle could be the

answer to the problem of cancer. Nevertheless, I say: let's give our hearts a chance. Cancer-free life is within reach, even faster than we can imagine, and it is found within our hearts, minds, and souls, and in the lifestyle we choose to live. When we each realize the truth that we are meant to live with peace and love in our hearts; that we are safe on this planet; that rejuvenation is our birthright; and that creation guards and protects us from beginning to end the world changes in our eyes, and our struggles and fears are laid to rest. In this way, we unlock our own healing. In essence, this book is a summary of the best paths and tips I learned along the way - the ones that have stayed with me and that she uses to this day, more than 15 years after being completely cured of cancer. ??? Fast tips to consider The book is short for a reason: to provide readers with fast tips to consider, steps to integrate into their lives, and habits and thoughts to reconsider and change. Don't underestimate a single step. Each of the steps, even the smallest, makes up an essential part of the whole equation of being healthy and happy forever. ??? A tool of great importance The book is a tool of great importance for any cancer patient, patients families and their children, as well as doctors, nurses, and social workers.\*This book is not intended to prevent, diagnose, treat or cure disease. The book was written by a former cancer patient. The author wrote this book to share her personal research, experience and opinion, not to provide medical advice.

cancer 100 things to do besides chemo kindle edition by michal peleg download it once and read it on your kindle device pc phones or tablets use find helpful Cancer - 100 Things To Do Besides Chemo has 6 ratings and 2 reviews. Allen said: As a survivor of skin, bladder and eye cancers, I devour everything I can You will want to weigh the benefits of each treatment option against the possible doctors who treat cancer with medicines such as chemotherapy or hormone therapy Alternative treatments are used instead of a doctors medical treatment. Whether or not you continue treatment, there are still things you can do to help And I will remember always that while I may have cancer cancer does not Other Ways to Treat Cancer Besides Chemotherapy & Radiation that chemotherapy and radiation can increase cancer risks by up to 100 times. What does chemo do? There are more than 100 chemo drugs used today. Doctors . Are there other ways besides chemo to treat my cancer? What I haven't yet done is to look at the arguments cancer cranks Before we take a rational look at what chemotherapy can and can't do, let me just point out that there With a meager success rate of 2.3%, selling chemotherapy as a medical treatment (instead of a scam), That is a 100% failure rate. He told me he

would not recommend chemotherapy. cause certain types of cancer cells to die in much the same way that normal cells do. Both chemotherapy and radiation treatment protocols for cancer have one Chemotherapy began nearly 100 years ago, when mustard gasStop feeling like a victim and regain the ability to control your health.
