

Flynn (The Love Family Series Book 3)

Flynn Love knows a thing or two about women. When he loses a bet to his buddy and is forced to play tour guide and babysitter to the man's little sister, he's warned she can be a handful and is always attracted to losers. Flynn has one job: show her around her new home on Love Island and scare away the creeps while winning her over with his charm. Should be a piece of cake, right? Wrong. Expecting some nerdy scientist with a big brain and even bigger glasses, he's stunned to find out the woman he's to spend time with turns out to be sex in spiked heels with an even sharper tongue. Mia Stewart has had a tough time of late with break-ins at her home and a mugging that sent her to the emergency room. The universe is conspiring against her and screwing her at every turn. When her boss offers her a job at his new lab on a luxurious island to continue her research, she jumps at the chance to sneak away from the troubles plaguing her and leave them behind. When trouble follows her to the Island and threatens her new life, she'll rely on the one person her brother trusts to keep her safe, even if the two clash in every way but sexual tension. When things heat up, it's more than her life on the line she needs to worry about. It's her heart. Can the playboy change his ways, or is he a brain cell shy of keeping up?
