

Train your brain

There is no argument that brain is the most vital organ in our body. The brain has over 100 billion nerves that have to deliver messages through trillions of synapses. Each area of the brain is responsible for a different part of our functioning body. We don't really even think of what our brain is responsible for until it has trouble carrying out its duties. While it is common for us to take this mighty organ for granted, there are ways that we can exercise it and strengthen it just as you do for the muscles in your body that you wish to tone. No one will see your toned and strong brain, but they will certainly witness the results of your hard work with your improved memory skills and retention of facts. This book will help you to remember more, stress less, and have a little fun as you play some brain games to strengthen this dynamic organ.

Your brain has the ability to learn and grow as you age a process called brain plasticity but for it to do so, you have to train it on a regular. The human brain is an incredible organ, but one that needs to be kept in shape. These 9 tips to train your brain will help you become a little bit.
